Cherry Class Homework Grid for Autumn Term 1:

Choose a challenge each week, in any order.

You can use this book to complete any home learning.

Science

This half term we are learning about everyday materials, comparing the properties and considering what objects are made of.

Choose an inventor and find out about the new material they came up with, and why it was an innovation (e.g. Alexander Parkes, Wallace Carothers, John Boyd Dunlop, Joseph Aspdin or Stephanie Kwolek).

Maths

Please regularly use Numbots at home – we will award certificates weekly to celebrate levels and consistent use.

Help your child out by recapping the composition of numbers.

We are using the sentence _ is made of _ and _, e.g. 9 is made of 4 and 5. Using equipment children can find all the possible ways to make a number systematically.

English

We are building compound sentences – sentences that can stand alone but are joined together with a conjunction like 'but', 'so' or 'because'.

e.g. I am hungry. I made a sandwich. I am hungry SO I made a sandwich.

Try to build some of your own compound sentences, you could write about anything or could use penguins as a starting point.

RE

We are thinking about kindness and the bible stories which taught about kindness in Christianity.

Can you make a cartoon strip retelling The Good Samaritan, or another which teaches the same message.

Art

We will look at a few artists who are inspired by what they find and collect this half term, such as Alice Fox or Nicole White. Create your own artwork starting from something you have found!

Geography

We are learning about 'the white continent' Antarctica and an animal which has adapted to live there, the penguin.

You could either:

- Make a model of Antarctica showing the animals that live there.
- Find out about an animal that has adapted to living in a coastal environment – perhaps even on the Norfolk coast.

Don't forget to keep up the spellings, reading and number fluency tasks!

Handwriting

Letter formation guide – remember that when writing you usually start at the top.

You can use letterjoin as well as practicing writing using pens and pencils.
